

# Swine What?

**I**t seems that every fall season, we Angelinos are plagued with the same dilemma. We spend hours dealing with allergies, asthma, the flu, and polluted air due to fires and vehicle emissions. As the school year begins, we form our militia of allergen- and asthma-fighting coalitions. We receive vaccines to combat the flu, use our appliances on allergy-fighting mode, and stay indoors along with our loved ones. If that is not enough, due to our geographical location, we inherit Santa Ana winds that nourish wild fires, polluting the air we breathe and causing us to stay indoors. We craft efforts to make healthy conscientious lifestyle decisions, especially during the allergy seasons. However, have we considered our indoor air quality and how it can shield us from our daily autumn concerns?

Many people believe their heating and cooling system is already cleaning the air of indoor pollutants and allergens. The fact is most air conditioning systems are

equipped with standard filters designed primarily to keep large particles from damaging the equipment. They do not actually clean the air. Recent innovations from American Standard have produced effective whole-home filtration systems. Professionally installed, American Standard's AccuClean™ can clean up to 99.98% of allergens from the air. During flu season, it's a powerful tool in battling the flu

**“During flu season, AccuClean™ is a powerful tool in battling the flu virus while filtering the majority of irritating particles like dust, pollen, pet hair, dander, dust mites, mildew, lint, fungus, most tobacco smoke, cooking grease, and bacteria.”**

virus while filtering the majority of irritating particles like dust, pollen, pet hair, dander, dust mites, mildew, lint, fungus, most tobacco smoke, cooking grease, and

bacteria. A study reviewed by the Harvard School of Public Health proved that nothing cleans the air in your home as well as an American Standard AccuClean whole-home filtration system. Forming an alliance between your heating and air conditioning system, AccuClean and a professional contractor, like Air Pros, can prove to be a successful union in delivering pristine air and combating these autumn day-to-day foes.

## Air Conditioning & Heating

**We Will Beat Any Competitor's Written Estimate**
